Parents Should Act

The meeting of the Brooklyn Parma Royalton Civic Association next Friday evening, April 6, will give Brooklyn parents an opportunity to express how great their desire is for more school facilities for their children.

All parents should be interested in the schooling of their children under the best possible conditions and it behooves fathers and mothers to come to the B. P. R. session and take part in the discussion for more educational accommodations for Brooklyn chil-

It is true that other sections in Cleveland need school facilities as much as Brooklyn, but this should not prevent Brooklyn from demanding more schools. Every community should fight for its own interests first. It's the wheel that squeaks that gets the grease. Other Cleveland communities are working for more schools for their communities and unless Brooklyn does the same it will be left out in the cold as far as adequate schools are con-

We Welcome the Patrol

We welcome the sheriff's police patrol for the lonely highways in South Brooklyn's neighborhood.

Hold-ups and robberies are becoming a nightly occurrence and recently murderers have made our dark highways a dumping ground for their prey. To travel State, Pearl, Ridge, Broadview or Brook Park roads at night is done only at the peril of one's life. No doubt the sheriff's patrol will drive away some of the robbers and murderers who have been terrorizing the community, and climinat many of the hazards for night travelers.

Harv. 2704 Riverside 182-R Creveland Institute of Engineers at Middlesbrough (England) by Ernest Bury of the Skinningrovo Iron and Steel works. Mr. Rury showed that i he lad succeeded in extracting ethyl alcohol and its derivatives. The practical working of Mr. Bury's process at the Skinningrove plant, where 5,800 tons of coal are carbonized per week, reveiled an average yield of 1.6 galions of alcohol per ton of coal carbonized. The total weight of coal reduced to coke in the United Kingdom in 1918 having been 14,635,000 tons. to the entire amount of coal would plaything! I know now you are vield 23,416,000 gallons, the value of an enemy of Love."—See Everywhich would be \$11,395,000. The re- woman at Y Theater, next Mon., covery of alcohol at the gas works of Tues. and Wed. the country would yield a further 7. 000,000 gallons, or, alcohol and benzol taken together, would amount to 114. 000,000 to meet the requirements of the country, which amounts to 160,-000,000 per annum.

How He Saved Coal. "I suppose you got your winter coa in before the great strike, didn't you?" was asked of Mr. Thompson. "Well, I fixed it another way," was

the reply. "In what way?" "Why, I got to, thinking what 12" tons of coal would cost and we moved into a house where there were already two families. Three families of us in eight rooms, you see, and we each pay one-third of the cost of heating. There are six of us grown folks and eleven children, and so far the house has been so hot that we haven't had to burn half a dozen scuttles of coal. Try my plan once and you will take no RETURN FROM FLORIDA.

Mr. and Mrs. H. H. Bratten, of W. 35th St., returned Tuesday morning from Lake Como, Florida. Mr. Bratten says it was 90 in the shade when he left Florida but that there was snow as far south as Georgia.
